THIS IS UNCLASSIFIED INFORMATION

- for industrial construction in East Berlin, it was determined that the projected underground bunker installation in Niedlow which has a 25,000 cubic meter volume, capacity is to be enlarged by a [REDACTED] plant in which [REDACTED] are unloaded [REDACTED] fuel. The leading [REDACTED] to take place at the removal of the fuel. It has not been determined who will carry out the designing of the leading plant. The final date for the completion of the installation will therefore be post-pone, although the State Secretariat for State Reserves is urging a speedy completion.
2. The pumping station of the underground bunker installation is allegedly designed so that the bunkers can be later expanded one hundred percent. The pipe lines were to be laid in such a way that the containers could be controlled by a suitable piping system.
3. Both VK (general type of benzine) and DK (Diesel fuel) are to be stored. Provision for the cleaning of the containers and pipes will be made in case VK should have to be stored in containers in which [REDACTED] be stored before [REDACTED]
